SURVIVAL QUIZ
Do you have what it takes?

WEIRD BUT TRUE
OUTRAGEOUS FUN FACTS

Go on Safari
Around the world with Oscar the dog!
Meet giant pandas, spider monkeys and more endangered animals.

Issue 99 November 2012 R27.00 (VAT incl.)
BOOK OF SPELLS

AVAILABLE 16 NOVEMBER 2012

FROM J.K. ROWLING

SONY
I’ve always enjoyed road trips and I like them even better if they are just a bit unpredictable. It’s great when you can stay longer in an interesting place or take a different route, not knowing who you might meet along the way. Naturally, you want a cool travelling companion and I can’t think of a better one than Oscar (just about the cutest dog in the world).

He and his owner Joanne are famous for their world woof tour to promote pet adoption. In this issue you’ll be going on safari around the world with Oscar. Starting near Cape Town, you’ll meet endangered animals on every continent and find out what people are doing to help them.

Talking of safaris, you could win an awesome family holiday to Sabi Sabi. It’s the top prize, along with cool cameras, in the Young Photographers competition (page 32).

Setting out in the early morning on a bumpy road into the bush is one of my favourite things. Here are some of the amazing animals I saw in the Sabi Sabi game reserve.

**Dare to Explore!**

---

**LETTER OF THE MONTH**

**DEAR FIONA**

I WENT WALKING IN THE KRUGER NATIONAL PARK LAST TERM. WE WERE ABOUT SEVEN METRES FROM A HERD OF 500 BUFFALO AND GOT AN ELEPHANT TO LISTEN TO US. THE ELEPHANT LIFTED ITS TRUNK BUT PUT IT DOWN AGAIN BEFORE I COULD TAKE A PICTURE, SO I ASKED THE ELEPHANT TO DO THAT AGAIN AND THIS IS THE PICTURE I TOOK.

CHRISTOPHER, 12, PRETORIA

Hi Christopher, that’s funny in a scary kind of way. Thanks for the picture. Presumably you weren’t talking to the elephant at the same time as dodging the buffalo! – ED.

---

**SUBSCRIBERS OF THE MONTH**

November’s subscribers of the month are Ewan Coetzee, Jenna-Ashley Labuschagne and Yosef Jacobson. They’ve each won a pair of Feyeue Kids sneakers worth R350. Feyeue understands the importance of a good fit for growing feet. You’re never too young to own a sweet pair of kicks and the Feyeue Kids Series offers just that. The Kid Series is suitable for all occasions with its simple, lightweight design, “casual chic” sleek and tone-on-tone versatility. They’ll definitely turn heads on the playground.

Visit www.facebook.com/feyeue.southafrica for more information. *See page 6 for terms and conditions.

---

**WRITE TO US!**

Send us your letters, birth date, pictures and comments. We want to hear from you, so start writing!

- Write to us at: The Editor, NG KIDS, PO Box 740, Cape Town 8000.
- Send us an email to fiona@ngkids.co.za or SMS us a letter to “NGK Letters” 33970.

*See page 47 for terms and conditions.*
I love helping save our planet

BETTER THAN EVER

- Stronger than ever
- Easy, smoother to apply
- Available in three new sizes
- Non-toxic and solvent free
- 90% renewable ingredients

A great idea every day.
**Things to do in November**

**Durban**

**FEEL THE BEAT**

Durban’s uShaka marine park will be hosting the Zulu Dance Champions competition 26 to 30 November. Over 60 dance troupes will be performing the *Indlamu*. This typical dance involves high-stepping and stamping the ground with all the dancers arranged in a line. The dancers often carry decorated shields.

**Cape Town**

**FLY A KITE**

Africa’s biggest kite festival takes place in Muizenberg near Cape Town on 3 and 4 November. Kite makers and fliers from around the world will be there. You’ll see giant cartoon characters take to the sky, as well as exciting stunt kiteing and *Rokakau* kite battles. These are Japanese kites made from bamboo and a traditional paper. You win if your kite can tip over your opponent’s kite or can cross its line.

While the non-stop kite flying is happening, you can take part in workshops, listen to live music and try out the yummy food stalls. There are also competitions to enter. It’s all for a good cause, as it is hosted by Cape Mental Health.

Go to [www.capementalhealth.co.za](http://www.capementalhealth.co.za) for more information.

**Johannesburg**

**PULL A PLANE**

A fully equipped surgical teaching hospital will be jetting into Johannesburg in November. The ORBIS Flying Eye Hospital is built into a DC-10 aeroplane. It is a massive plane with three engines, one on each wing and one on the tail. Its mission is to transport an international team of eye doctors to countries in the developing world where they help with operations to prevent blindness. You can book a free tour of the plane by contacting Laura van Zyl on 021-447-7135 or if you know some strong people you can take part in the plane pull. This fundraiser, taking place on 24 November, will see which team can pull the plane three metres in the fastest time.

**International Buy Nothing Day on 24 November**

It’s not shopping that’s bad—it’s just that we buy way too much stuff! We are using up our natural resources much too quickly. Here are five ways to support the day!

1. Don’t buy anything (duh!).
2. Harter: get your parents not to buy anything.
3. Spread the word: make a poster and tell people about it.
4. Trade it! Swap things with your friends.
5. Make it fun! Instead of going to the movies, have a board game evening.

**All around the country**

**24 Nov Birding Big Day**

Get a group of family and friends together. List the number of different bird species you see in 24 hours. Find out more on [www.birdlife.org.za/events/birding-big-day](http://www.birdlife.org.za/events/birding-big-day).

Join Joanne Lefson and Oscar the dog.

IT'S PRETTY FUNNY when someone sees a mutt like Oscar in the front seat of my car. As soon as we start driving, he likes to turn on the air conditioning and bark at everyone we pass along the way. It's his way to say "Hello" and to tell the world that we're on our next global adventure to promote the underdogs!

Oscar is my perfect road trip buddy. He's been my best friend ever since I rescued him at an animal shelter in Cape Town. He's always there to wag his tail whenever we hit a bump in the road. He's also taught me a lot about exploring and protecting nature, as well as teaching me that every animal has a special place in this wonderful world.

This special "Go on Safari" issue does the same thing, taking you around the world to explore the seven continents and some of the endangered animals that live there. Assisting animal experts, you'll travel through the continents in a souped-up off-road vehicle to meet animals such as the island fox, giant panda and blue whale. The animals were picked by a team of NG KIDS readers, so we know this issue is packed with things you care about.

Oscar knows how cool it is to explore. Sometimes I'll just follow him and see where he takes us. He'll chase a monkey in Asia or stalk a lion in Africa or even fish for anacondas along the mighty Amazon River in South America, and I'll discover this amazing new world. Lots of animals, like squirrels and birds, are this way. If you follow them, they'll take you somewhere fantastic.

When people first meet Oscar, they can't believe he is from a shelter. He's friendly and adorable. Once they get to know him, they also want to adopt a wonderful dog at a shelter. I think that's what exploring is all about: When you experience animals and nature by yourself, you really understand why we should respect and protect it. Incredible worlds are hidden under rocks, in streams and even in your garden. There's always a little piece of wild somewhere and an adopted dog to show you the road.

If Oscar could talk, I think he'd say the world is full of cool animals like him and it's important to take care of them all. He'd say that exploration is the key to understanding how awesome nature is. After that? Well, he'd ask you to bring him a full tank of petrol. There's always another new place to discover and that's the best treat of all.

Oscar was adopted from the SPCA. In 2009 he set off on a worldwide adventure to explain why adopting dogs is a cool thing to do. Oscar and his team travelled 350 000 kilometres through 31 countries in just 9 months. You can check out his pics of his adventures on www.worldwooftour.com
Destination: AFRICA
Endangered Animal: AFRICAN PENGUIN

FEATURES BY CRISPIN BOYER
COOL FACTS BY KRISTIN BAIRD RATTINI
ART BY TYSON MANGELSDORF

THE JOURNEY STARTS ALMOST AS FAR SOUTH AS YOU CAN GO ON THE AFRICAN CONTINENT – on Boulder’s Beach in Simon’s Town, outside Cape Town. In Africa we have penguins on the beach in the heat. Your guide, biologist Ross Wanless, has a plan to help save these endangered birds.

Once numbering in the millions, African penguin populations have declined by as much as 90 percent. People used to collect penguin eggs for food and their nesting material for fertilizer. Now the birds face commercial fishing fleets that overfish their favourite food around the breeding islands.

New penguin colonies on the southern tip of the continent – where coastal waters still have plenty of fish – would give the penguins a fresh start. The trick is moving young birds there and encouraging them to stay. Ross wants to build artificial islands large enough to hold 10 000 penguins each. “We would put up fake penguins and play sounds of penguins over speakers,” he says. “Whatever it takes to make them feel at home.”

Still in the planning stages, these penguin islands are at least five years away. Today, as you watch the birds slip into the surf, you wish the penguins happy hunting.
10 COOL THINGS ABOUT AFRICA

Up to 400 sociable weaver birds may share a nest.

An ostrich’s eye is larger than its brain.

Lemurs in Madagascar can weigh as little as five coins or as much as a car tyre.

Some baobab trees are more than 2,000 years old.

An African elephant’s trunk has more than 100,000 muscles.

Witches in Tanzanian legends ride on hyenas, not broomsticks.

A board game was found in King Tut’s tomb.

Planet Tatooine in Star Wars was named after a real village in Tunisia.

Rhino horns are made of the same substance as human fingernails.

A guenon monkey’s warning call sounds like a loud sneeze.
“YOU NEED PATIENCE, luck and a guide who knows where to look to see an Iberian lynx in the wild,” says Miguel Rodrigues, your local lynx expert. Today you have all three. “There, behind that bush,” he says. You grab the binoculars, focus and spot the hornlike tufts of black fur poking above the leaves. You’ve caught a glimpse of the world’s most endangered cat! “Isn’t their camouflage terrific?” Miguel says. “They can disappear if they want to.” Unfortunately these cats have almost really vanished. Iberian lynx live in a few pockets of protected forest in Spain and possibly Portugal. Their habitat has been chopped down to make way for farms, tree plantations, cities, dams and highways. Lynx numbers have plunged.

Scientists are taking emergency action. They’re breeding captive lynx and establishing protected areas. Captive-bred lynx were released in 2010 and they have since raised cubs.

You wonder if the lynx you’ve spotted behind the bush is one of these success stories. Fewer than 300 of these cats are left in the world, so you feel lucky to have seen one. “The lynx is a relatively small feline that doesn’t need much space,” says conservationist Dan Ward.

You hope humans and these wild cats can become good neighbours.
10 COOL THINGS ABOUT EUROPE

The average hedgehog has 4,000 to 7,000 spines.

Creating human towers up to 10 metres tall is a tradition in Spain.

Roller-skiing is a popular sport in Norway.

A child’s footprint found in a French cave is 25,000 years old.

It takes 65 tons of paint to cover the Eiffel Tower.

The Rubik’s Cube was invented in Hungary.

A popular soft drink in the United Kingdom is made of dandelions.

Nodding your head means “no” in Bulgaria and Greece.

A reindeer’s nose heats up air on its way to the lungs.

In Portugal it’s considered rude to write in red ink.

Lynx kittens so cute!

You saw kittens?

Yup, fed with bottles.

I guess not in the wild.

Raised captive, but also saw wild lynx.
YOU’VE TRAVELLED TO a bamboo forest in the mountains of southwest China to see a giant panda, but you never expected to find several black-and-white creatures wearing shoes and carrying clipboards. One of the pandas yanks off his head and hands it to you. "Put this on," he says. These "pandas" are scientists wearing panda suits!

The scientists at Wolong Nature Reserve are trying to boost panda numbers by breeding captive animals for release into the wild. Hoping to keep the cubs from becoming used to humans, the scientists put on panda disguises before entering the animals’ enclosure. As you watch the keepers coax a cub from a tree for a checkup, you can’t help but feel protective of the baby panda.

Fewer than 1,600 giant pandas live in the mountain forests of China. A panda devours nearly 18 kilograms of bamboo each day, but logging, highways and human settlement have harmed large patches of bamboo forest. “These animals are increasingly challenged to survive,” conservationist Marc Brody says.

Reintroducing giant pandas into the wild will help save them, but the long-term restoration of their habitat is even more important. You realise everything possible must be done to make sure that forests are restored.
Soup made of BIRDS’ NESTS is a Chinese delicacy.

People in Thailand have water fights to CELEBRATE THEIR NEW YEAR.

A city in the United Arab Emirates holds an ANNUAL BEAUTY PAGEANT FOR CAMELS.

People in Singapore used to be fined for not flushing PUBLIC TOILETS.

The huge KOMODO DRAGON from Indonesia can swallow A GOAT whole.

Tulips were first grown in TURKEY.

The binturong, or BEARCATS, of southeast Asia can smell like buttered popcorn.

There’s a golf course between TWO RUNWAYS AT ONE ASIAN AIRPORT.

The Malay word “orangutan” means “PERSON OF THE FOREST.”

The number four is considered UNLUCKY IN CHINA.
IN THE FORESTS of northwestern Tasmania, you’re with scientists who have trapped a wild Tasmanian devil. You know the cartoon creatures as whirlwinds of slobbering fury, so you brace yourself for a storm of screeches and growls.

Instead, you hear snoring. The devil is dozing. “Devils are very timid when you handle them in the wild,” says biologist Menna Jones as she eases the sleepy beast from its trap and slides it into a sack. “And they like snuggling with one another.”

Snuggle? Seriously? Yes: only food brings out the Tasmanian devil’s feisty side. “They’ll growl louder and louder until they’re screaming at each other,” Menna says. Feeding devils also nip one another as a way of saying “stand back!”

A rare, contagious and deadly cancer that spreads through bites puts Tasmanian devils on the endangered species list. To stop the epidemic, biologists began raising captive devils to isolate them from the disease. They also examine wild devils regularly to see how far the disease has spread.

The sleepy creature caught today represents hope for the species. It’s part of a population that seems less likely to get the disease. Scientists aren’t sure if the cancer is becoming less deadly or if the devils here are resistant to it. Either way, it’s good news.
One type of crab's pincers are so strong, they can crack coconuts.

A giant Australian rock formation called Uluru appears to change colour during the day.

A saltwater crocodile sometimes opens its mouth to help keep its brain cool.

Australia's Aboriginal people have mapped their own star constellations.

The Great Barrier Reef stretches nearly the same distance as from Walvis Bay in Namibia to Maputo in Mozambique.

In some remote areas, aeroplanes double as ambulances.

In Australia a kettle is also called a BILLY.

Men and women who work on large farms are called Jackaroos and Jillaroos.

A rabbit-like mammal called a BILBY is the Easter "bunny" for people in Australia.

Some wallabies have purple-tinged fur.
YOU'RE IN ANTARCTICA, searching for blue whales. It's a good thing your safari vehicle is submersible — the scientists aboard a nearby research ship are counting on you to spot the whales.

Swoosh! A three-storey geyser of mist erupts from the waves. A blue whale has surfaced to breathe. You get your camera ready to photograph the huge marine mammal. "If the whales are not interested in being around the ship, it's amazing how quickly they can vanish," biologist Paula Olson says.

Some blue whales grow to the length of a basketball court. They're the largest animals ever. A blue whale's heart is as big as a compact car. But they were hunted nearly to extinction. The species began to recover after hunting them was banned, but they're still rare. Now scientists want to know how well the whales are recovering. That's where your camera comes in. Each whale has a unique pattern of skin spots, which is like a fingerprint. By taking pictures of whales, you're helping scientists count them.

You photograph the skin around the fin on the whale's back — the spot scientists use to identify the animal. Just before it disappears below the surface, the whale lifts its tail flukes, which are as wide as a soccer goal, as if it's waving goodbye.
Two 41-kilometre races are held each year on this ICY CONTINENT.

MOUNT EREBUS occasionally SPEWS 3-METRE-WIDE lava bombs.

ELEPHANT SEALS living along the coast can stay underwater for up to TWO HOURS.

Scientists have retrieved 800,000-year-old ANTARCTIC ICE.

The ANTARCTIC ICEFISH has clear blood.

A tomato sauce bottle from 1912 was found in an old EXPLORER’S CABIN.

THE SOUTH POLE gets only about 2.5 centimetres of snow per year.

“The banana belt” is a group of nearby ISLANDS WHERE SUMMER TEMPERATURES stay above freezing.

Scientists visiting the continent must take a SURVIVAL COURSE called “Happy Camper School”.

WINDS here can GUST at more than 321 kilometres an hour.
Destination: SOUTH AMERICA
Endangered Animal: BROWN SPIDER MONKEY

A FARMER LIVING deep in one of Colombia’s rain forests has spotted a rare species of spider monkey thought to be extinct in the region. You join researchers on an expedition to find the endangered animal.

Spider monkeys spend most of their lives high in tree branches. They travel in social groups called troops. A spider monkey swings from branch to branch as easily as you walk from your sitting room to the kitchen. Its tail has a grip strong enough to support the animal’s entire weight, leaving the other four long limbs free to pick tasty nuts, fruits and leaves.

Hunting and habitat loss have threatened all species of spider monkeys. The one you’re searching for today – the brown spider monkey – is critically endangered. This forest is part of a national park, so any monkeys living here are safe from hunters and habitat loss.

Suddenly you hear whoops and wails. You spot a few dark shapes swinging from the highest branches – brown spider monkeys! “This is the only population found in a national protected area,” says Nestor Roncancio, a Wildlife Conservation Society researcher. “It’s one of the largest fragments of forest left with good habitat for the species.”
Several million species of insects live in the Amazon Rain Forest.

The maned wolf is nicknamed "fox on stilts" for its long legs.

A plant in the Andes Mountains lives for about 80 years. It flowers once, then dies.

A sloth can take one week to digest food.

Macaws often eat clay.

Roasted ants are a popular snack in Colombia.

A 1,600-year-old tattooed mummy was discovered on the continent.

No country in South America has ever hosted the Olympic Games. (That will end in 2016, when Brazil hosts the Summer Olympics.)

Male and female emperor tamarin monkeys have long, white moustaches.

On New Year's Eve in Brazil, people jump over seven ocean waves for luck.
“WELCOME TO THE ‘FOXPITAL,’” says your guide. The cramped clinic hardly seems like the sort of place that can help save an endangered species. But today the foxpit’s veterinarian will perform surgery on Waynuk, a four-month-old island fox that was attacked by an older fox. Friendly, fearless and roughly the size of a small house cat, these foxes are found only on the Channel Islands off the Californian coast in America. Every survivor counts.

In the 1990s golden eagles began hunting in the northern Channel Islands. “The foxes didn’t stand a chance,” says Tim Coonan, a National Park Service biologist. “They had evolved with no predators—and then suddenly these eagles showed up.” Meanwhile, foxes on a southern island began dying of a disease spread by animals introduced from the mainland. By 1999 these foxes were nearly extinct.

Conservationists sprang into action. They began breeding the foxes in captivity and releasing offspring into the wild. Golden eagles were relocated. Biologists vaccinated foxes against disease and treated sick and injured animals. Today the fox population on three of the islands has recovered. Waynuk’s surgery is a success, too. You leave knowing that the foxpit is standing by for the next emergency.
During battle, ANCIENT MAYA WARRIORS hurled containers full of hornets at ENEMIES.

The STAR-NOSED MOLE of eastern America and Canada has 22 TENTACLES on its SNOUT.

A narwhal whale has an 2.4-METRE-LONG TOOTH that looks like a horn.

Each year THE CAYMAN ISLANDS holds an 11-day PIRATE FESTIVAL.

The FLAP OF SKIN under a moose’s throat is called a bell.

Costa Rica is ranked at the top of the World Database of Happiness.

Canada produced enough MAPLE SYRUP in 2011 to fill 13 Olympic-sized pools.

Stretching from Colorado to New Mexico, the "DINOSAUR FREEWAY" contains more than 1,000 sets of footprints of dinosaurs and other ancient reptiles.

Canada’s Prince Edward Island is nicknamed "SPUD ISLAND" for all the POTATOES grown there.

VISITORS can take a STAIRCASE into a dormant volcano in MEXICO.
Check out these outrageous facts.

A sculptor carved chairs, a table, and a sofa out of chocolate.

A German fashion designer makes clothing from milk powder.

Goats snack on poison ivy.

“In African idol,” here I come.

Most tornadoes occur between 3 PM and 9 PM.

Some male mice sing songs to attract mates.

A man once blew a bubble-gum bubble that was larger than a basketball.

In Taiwan, garbage trucks blast music to remind people to bring out the trash.

Young giraffes sometimes moo.

Adventure Checklist

Whether you’re doing a quick stroll around the local botanical gardens, walking the dog, or setting off across the Kalahari in search of archaeological treasures, make sure you have the right gear with you.

☐ A cool hat
WHY YOU NEED IT?
Sunburn hurts and real adventurers are far too smart to let get roasted. Remember the sunscreen. The right hat can make you look cool, so shop around for the best.

☐ Digital camera
WHY YOU NEED IT?
In case you can’t draw. Or to document the excavation of the ancient remains you find deep in the Kalahari. You’ll need the photos for the best-selling book you’ll write. Also—you may just be the first person to discover a new animal or bird. You’ll kick yourself if you don’t get a picture of it.

☐ A pair of binoculars
WHY YOU NEED IT?
To check that the coast is clear before deciding going further, to read signs in the Botanical Gardens without having to walk all the way up to them or for spotting the last living dinosaur before it spots you. Also useful for finding the dog. Some people use binoculars to watch birds or game.

☐ GPS
WHY YOU NEED IT?
Wouldn’t you look a bit silly if you couldn’t find your way out of the Kalahari—not to mention the botanical gardens? But, if you fancy yourself the rugged, Indiana Jones type, you may prefer a compass. It’s a bit old-fashioned, but reliable.

☐ Swiss Army knife or leatherman
WHY YOU NEED IT?
You never know when you might need to dismantle a helicopter, take a stone out of a horse’s hoof, or open a cool drink bottle that doesn’t have a screw cap.

☐ Water
WHY YOU NEED IT?
You’re crossing the Kalahari. And your dog might get thirsty.

☐ A Frisbee
WHY YOU NEED IT?
It’s a good way to make friends. You can use it as a cutting board or a plate. You can use it as a hat to keep the sun off your face (even though you’d look silly) and it’s a great way to make sure your dog gets lots of exercise without having to walk far. Also good if the dog gets thirsty.

☐ Notebook and pencil
WHY YOU NEED IT?
To take notes. You might want to take notes on birds or plants or even sketch them. All the really cool explorers, like Stanley and Livingstone, made sketches.

☐ Good walking or running shoes
WHY YOU NEED IT?
You’ll be walking a lot and you wouldn’t want blisters or any other explorer’s ailment. You never know what you might need to run away from, so you want good treads that can handle the action.

☐ Kikoi or sarong
WHY YOU NEED IT?
Use it as a scarf, skirt, towel or bag. You can make a bandage out of it, wave it in the air if you need to call for help. Sling it between two sticks for some shade or wrap it around your head like a turban—not as cool as a cool hat, but better than a Frisbee.

ADVENTURE QUIZ
(For the Not So Faint-Hearted!)

Do you have the survival skills to go on an adventure? Even if you don’t, it’s never too late to learn! Test your survival savvy below.

1. You are lost in the desert and about to run out of water. You...
   A. drink as much as you need.
   B. save the water and eat something.
   C. pour the water on your head.
   D. rub the water on your wrists.

2. What is the number-one rule when hiking in the mountains?
   A. Take a compass.
   B. Tell people where you are going and when you’ll be back.
   C. Wear leather boots.
   D. Get to the summit before your friends.

3. You come across a stream but you are not sure if it’s safe to drink the water. So you...
   A. boil it.
   B. take a chance.
   C. leave it in the sun, then drink it.
   D. drop an aspirin into it first.

4. You’re on a walking safari and come across a rhino. You...
   A. run like crazy.
   B. shout loudly.
   C. go closer to take a picture.
   D. climb a tree.

5. Make sure you won’t get struck by lightning while camping by...
   A. hiding under a big tree.
   B. diving into a pond.
   C. crouching with your head between your knees.
   D. wearing a hat.

6. To avoid getting bitten by a snake, you should...
   A. keep to thick bush and tall grass.
   B. creep along quietly so you don’t disturb them.
   C. wear hiking boots and long trousers.
   D. lift up rocks with your hands.

7. Your friend got caught in a storm and might have hypothermia. You...
   A. let him walk around and stretch.
   B. make him take a hot shower.
   C. remove all wet clothes and keep him horizontal and warm.
   D. give him hot chocolate.

8. If you fall in quicksand, you should...
   A. wave your arms and try to get out.
   B. relax and try to float to the surface.
   C. hang around and wait for crocs to eat you.
   D. try to swim in the sand.

9. You are stuck on a mountain. You want to send the SOS distress signal in Morse code using a mirror. The SOS Morse code is...
   A. three short flashes, two long flashes, three short flashes.
   B. two long flashes and one short flash.
   C. three short flashes, three long flashes, three short flashes.
   D. five short flashes and one long flash.

10. If you’re building a shelter against the cold, you should:
    A. make it so small that you can barely fit into it.
    B. build it on the banks of a stream.
    C. build it with rocks and sand.
    D. build it in a field so it can be warmed by the sun.

11. You’re stranded on an island and you have to get the attention of the rescue team. The international fire distress signal is...
    A. Three fires in a line.
    B. Three fires in a perfect circle.
    C. One fire on a beach.
    D. Three fires in a triangle.

How Did You Score?

8 to 9 Correct
Super Survivor
You’re a true survivor! You thrive in jungles and mountains and are always ready for whatever nature throws at you. You could be the next Bear Grylls! Just remember to stay safe and ask a parent’s permission before you go on an adventure.

6 to 8 Correct
Calm Traveller
You’re almost there—you are very logical and always choose the safe option. Sometimes you need to follow your instincts when it comes to surviving, no matter what the books say.

4 to 5 Correct
Panick Mechanic
You love nature but have trouble staying calm in a stressful situation. Remember to stay calm and follow your instincts. Help will be there soon—you just have to hold on!

0 to 3 Correct
City Slicker
Adventures are fun, but perhaps you shouldn’t go further than your garden! There is adventure and beauty in all things on the planet. Do more research and consider taking a parent with you on your quest.

Adventures are exciting, but it is more important to be safe and never put yourself or your friends in danger. Always ask a parent’s permission before going on an adventure!
THE Nº1 DANCE GAME BRAND MEETS THE MAGIC OF DISNEY!*

JUST DANCE

Disney Party

Rediscover beloved Disney songs through fun kid-friendly choreographies

Available October 26th

LAST CHANCE TO ENTER
PRIZES WORTH R110 000 ARE UP FOR GRABS IN THE SEVENTH NG KIDS YOUNG PHOTOGRAPHERS COMPETITION!

WHAT TO DO:
- Decide which category you want to enter, grab your camera or cell phone and take a picture of anything that catches your eye.
- You may enter one picture in each of the four categories.
- It’s not about using a top-of-the-range camera, it’s about capturing a unique and interesting photo that shows us how you view the world.
- Entries opened on 29 August and close on 20 November 2012.

WAYS TO ENTER:
1. See page 33 for the entry form and terms and conditions.
2. E-mail or MMS to ypc@ngkids.co.za. Remember to write “NG KIDS YPC” in the subject line and add your photo title, category and age group.
3. Post: NG KIDS Young Photographers Competition, PO Box 740, Cape Town 8000.
4. Delivery: NG KIDS Office, PO Box 740, Cape Town 8000.
5. Online: Ask a parent to visit the National Geographic Kids SA fan page on Facebook and click on the Young Photographers Competition tab. www.facebook.com/NationalGeographicKidsSA.

WIN
Each of the 12 finalists (three in each category) will win a year’s subscription to NG Kids, a Nikon Coolpix 5200 Camera and a pair of 10x25 Sportlite Binoculars. Courtesy of Nikon. Plus, a hamper with a Sandisk 8GB Extreme Pro 95MB/s SDHC Card, Sandisk Clip+ MP3 Player (4GB) and a Sandisk micro SD 4GB SDHC with adapter.

BE QUICK! The first five entrants will get a Sandisk 8 GB Extreme Pro 95MB/s SDHC Card.

CATEGORIES:
- I Love South Africa
- That’s Funny
- Animals
- People

A PANEL OF EXPERTS WILL JUDGE THE ENTRIES BASED ON CREATIVITY (50 PERCENT) AND PHOTOGRAPH QUALITY (50 PERCENT). THE PANEL’S DECISION IS FINAL.

OPEN TO ALL KIDS FROM THE AGE OF 6 TO 14.

GRAND PRIZE:
The overall winner can capture amazing pictures with a fantastic Nikon D3100 Twin Lens Kit (18 - 55mm VR + 55 - 200mm VR) worth R7 000 and free camera training, a special Sandisk hamper valued at R1 499, as well as a family holiday for four (two adults and two children up to the age of 15) at the Bush Lodge, courtesy of Sabi Sabi. Sabi Sabi is one of the premier private game reserves in the Sabi Sand Reserve, South Africa. Bush Lodge has 25 luxurious suites and has special appeal for visitors and families seeking the excitement of the Big Five. Visit www.sabisabi.com for more information. Airlink is sponsoring return flights for the winner (two adults and two children) from either Cape Town, Johannesburg or Durban to Kruger Mpumalanga International Airport. The total value of the holiday is R37 100. The winner will also be entered into the International Photography Contest 2012 For Kids and could win a trip to Washington in America to visit the National Geographic Society!

**PHOTO TIPS**

**TIP 1** Change your perspective! Whatever you are shooting – try a low angle or stand on something to shoot from above. This is a simple way to get a different perspective and make objects appear more interesting.

**TIP 2** When photographing people (or even pets) you must talk to them and make a connection. You will see the energy in their smile! Remember to focus on the eyes, as it draws people into your photograph.

**TIP 3** There is no right or wrong image. Try to capture what you see, but also try to capture what you feel when looking at a scene. You can over- or underexpose images to add or extract warmth. Using different white balance settings also adds interesting aspects to wildlife and nature photographs.

**TIP 4** When shooting wildlife, try to zoom in on an interesting part of the animal, like the mud on an elephant’s ear. Choose this to fill your frame.

Lauffen, Germany
Luna the cow really stands out from the herd. The bovine not only lets her 16-year-old caretaker ride on her back – Luna can also leap over hurdles.

Owner Regina Mayer decided to try riding with Luna after learning she couldn’t have a horse. She began training the farm animal by taking her for long walks. Then Regina saddled Luna and carefully rode her around. Once Luna got the hang of riding, she was ready for another challenge – jumping.

After months of practice and plenty of treats, the cow could leap over obstacles. Now Luna loves to show off her horselike moves and even responds to commands such as “go,” “stand” and “gallop.”

“Cows are intelligent animals,” says veterinarian Owen Rae. “With repetitive coaching and a caring trainer, they can learn to do a lot.” In other words, these gals are udder-ly amazing.

– Richard De Rooij
CAT HAS 26 TOES!

Wisconsin, America
Daniel the cat’s paws might make people, well, pause. Most cats have 18 toes, but this tabby was born with 26— an extra two on each foot.
Daniel’s additional digits don’t stand in his way. “He behaves just like other cats,” says Amy Rowell of the Milwaukee Animal Rescue Center, where Daniel lives. His supersized feet sometimes even give him an upper hand. “He’s a pro at grasping toys we wave in front of him,” Amy says.
The feline’s paws also helped his rescue centre. Just before Daniel arrived, the centre found out it was going to lose its housing. After people heard about Daniel, many gave the centre $26—one dollar for each of Daniel’s toes. Soon the centre had enough cash to buy a new home. “We may have rescued Daniel,” Amy says. “But then he turned around and saved us.” — Andrea Silen

MONKEY HELPS OUT

Massachusetts, America
When Ned Sullivan needs to wash his face or untie his shoes, Kasey the capuchin monkey is there to help. If Ned is thirsty, Kasey will open a water bottle for him and put in a straw. She even scratches his itches!
Kasey met Ned, who was paralysed in a car accident, after attending Monkey College. This school trains capuchins to assist people with disabilities. There she also learned to load DVDs, turn book pages, switch lights on and off and more.
Now Kasey uses her skills to make Ned’s life easier. She’s also challenging him to heal faster. The monkey makes him reach for objects and places things in his weaker hand so he can exercise it. All this has helped him regain a lot of movement.”“Kasey takes me further every day,” says Ned. — Elizabeth Carney
BY JOHNNA RIZZO

Say you're a clownfish living in the Great Barrier Reef off northeastern Australia. You've been captured and have ended up in a dentist's aquarium. Could you count on your dad to rescue you?

You could if your name was Nemo and you were in the movie Finding Nemo. But in real life you would probably be stuck. Although clownfish males guard their eggs aggressively, they don't stick around once the fish hatch.

To celebrate the rerelease of the movie in 3-D, NG KIDS checks back on which parts of the movie were fact and which were just fishy.

MMM... SCRAMBLED EGGS!

Like a real clownfish, Nemo's dad tries to defend his nest when a vicious barracuda ploughs in for a feeding frenzy. Do barracuda really have a taste for eggs? No, says ichthyologist Adam Summers, a fish scientist who was a consultant for the movie. But once the eggs hatch and the fish get bigger—look out! A barracuda would definitely sample the menu.

THANKS A LOT, DAD

Marlin isn't a candidate for Worst Father of the Year because he tells Nemo to swim through stinging anemones. By rubbing against the anemones, clownfish develop a special slime on their scales that keeps them from getting stung. Another weird fact about clownfish is that they change gender as they grow! When the head female of a clownfish group dies, the biggest male turns into a female to take her place!

ENGLISH, AUSTRALIAN STYLE!

FLAT CHAT: Going very fast

YONKS: A long time

FULL AS A GOOG: Ate to much

BONZER, MATE! That's outstanding, friend!

PIG'S BUM: No way!

RIDGIE DIDGE: The real thing
**UNDERWATER EXPRESSWAY**
Marlin and his travel mate Dory have to make it in record time from the deep ocean to Sydney, Australia—they just hop on the East Australian Current. It’s a real current, a kind of fish highway that flows along the east coast of Australia. “It’s possible for a tropical fish to hitch a ride and follow it quickly for thousands of kilometres,” Adam says.

**SAY THAT AGAIN?**
Dory the regal blue tang couldn’t remember the colour of her scales if she wanted to—but that’s probably not giving fish enough credit. Although they’re not exactly ichthyologists, fish “learn” from past experiences, such as finding food.

**CHEW ON THIS**
Marlin and Dory meet a great white shark named Bruce who claims to be a vegetarian. You’d have to have fish for brains to believe that, but not all sharks eat fish. The basking shark eats only plankton, which are tiny plants and animals that live in the ocean.

**INSIDE SCOOP**
There are nearly 2,000 species of fish in the Great Barrier Reef. “But there are only six basic fish shapes in the movie,” says Adam. Computers morphed the images so it looks like there are hundreds of different fish. The waves in the movie look real because the animators studied real waves. “Water particles that make up waves move in a circle,” Adam says. So the animators made the computerised water move in circles, too!
See **SAMMY'S 2**
in 3-D first with NG KIDS!

Best friends forever Sammy and Ray are enjoying the island life, shepherding new hatchlings Ricky and Ella out to sea. Out of the blue, a poacher captures them and ships them off to be part of a spectacular aquarium show for tourists in Dubai. There they meet the kingpin of the show, Big D the seahorse, who ropes them in his plans for a great escape. On the other side of the ocean with their new friends Jimbo the bug-eyed blob fish, Lulu the snippy lobster, a whole family of penguins, Sammy and Ray hatch breakout plans of their own. But little Ricky and Ella arrive determined to rescue them setting off a series of thrilling adventures and narrow escapes. Afterwards our heroes head south to meet up with Shelly, Sammy’s first and only love.

**When:** 18 November 2012 at 2 pm  
**Where:** Nu Metro cinemas  
**Johannesburg:** Monte Casino  
**Cape Town:** Canal Walk  
**Durban:** Pavilion  
**Closing date:** 9 November 2012

**HOW TO ENTER:**  
*SMS your entries to "NGK Sammy" with your name, surname, age, e-mail address and preferred viewing city to 33970.*

**PLEASE NOTE:**  
Only four tickets per family. There are 121 tickets available in Johannesburg, 195 in Cape Town and 165 in Durban. Free popcorn and drink included.

*SEE PAGE 42 FOR FULL TERMS AND CONDITIONS.*

TRAVEL WITH AIRLINK
Airline flies to more local destinations than any other airline and connects you to the smaller towns and regional centres in South Africa with over 3,000 flights every month. Adults earn Voyager miles when flying with Airlink and we take special care of kids who fly on their own—so they'll be comfortable flying with us. Visit www.flyairlink.com

TERMS AND CONDITIONS
"FOR ALL COMPETITIONS AND GIVEAWAYS IN NG KIDS"

All entries must include your name, age, postal address, home telephone number, cell number, e-mail and any mandatory information specifically requested for inclusion in the competition, including answers to qualifying questions unless otherwise specified. Prices and giveaways cannot be transferred or exchanged for cash. If you cannot meet any one of the entry requirements, the judges reserve the right to award the prize to a runner-up. NG KIDS has the right to substitute the gift or prize with something of the same value. The copyright of all entries, letters, photographs, artwork, SMSs and questions belongs exclusively to NG KIDS and NG KIDS reserves the right to edit and reproduce them in any media. Winners may decline to have their name used in advertising or listed publicly.

Competitions and giveaways are open to anyone 14 years or older, unless otherwise stipulated. Unless specified on submissions or entries from South Africa are allowed. If winners reside outside of South Africa they may be liable for import, passport and postage costs. The winners will be notified telephonically and their names will appear in NG KIDS magazine. The judges' decision is final and unconditional and it cannot be enforced. Allow two months for delivery of prizes for winners' announcements in NG KIDS. The prizes will be awarded to correct entries drawn randomly by computer after the closing date, except when there is a problem with the draw or it is stated otherwise. If the winner cannot be contacted within two weeks after the closing date, an alternative winner will be drawn. All competition entry SMSs are charged at R1.99 each. Free minutes and SMS bundles do not apply. You can enter as many times as you like, unless stated otherwise. By entering competitions online, via e-mail or SMS, you agree to receive future correspondence from NG KIDS magazine and the prize sponsors. You can opt out at any stage by sending an e-mail containing your name, surname, cell number and e-mail address with the subject line, “Opt Out”, to optout@ngkids.co.za. The entrant accepts that entry to the competition does not constitute a contract or any form of legal commitment between the entrant and NG KIDS, Media24 and the National Geographic Society.

NG KIDS will not assume liability for any ambiguity, error, oversight or omission whether negligent or otherwise which may be committed by any employee of the participating magazine, their agents or associates in respect of availability of prizes or giveaways published in the magazine or online. Entry is subject to the rules.

Winners in the November 2012 issue of NG KIDS close on 20 November 2012 unless otherwise specified.

GENERAL TERMS AND CONDITIONS FOR SUBSCRIPTIONS
Children must be an adult's permission, SMSs charged at R1. Free minutes and SMS bundles do not apply. Offer valid until 20 November 2012. The first 200 subscribers will receive a free limited edition NG KIDS magnetic photo frame. We reserve the right to replace the featured gift with one of equal value. Offer is valid in conjunction with the Vitality offer. Offer is only valid for active Vitality members. All subscribers receive a gift from NG KIDS.

YOUNG PHOTOGRAPHERS COMPETITION TERMS AND CONDITIONS
The competition opened on 29 August and closes on 20 November 2012. It is open to all readers who are 5 to 14 years old on 1 November 2012. All photographs must be the entrant’s own work.

- Only one photograph for each category per entrant will be accepted. All entries remain the property of NG KIDS and we regret that we cannot return any photographs or CDs. Please supply a residential address or a P.O. Box address. We cannot accept e-mail addresses or post boxes. In this instance NG KIDS reserves the right to publish photographs without credit and by entering into this competition they accept this. The National Geographic Society and Media24 accept no responsibility for loss or damage.

1. The judges will select the final winners. All final winners will be notified telephonically by mid-January 2013 and their names will appear in the November 2013 issue of NG KIDS.

2. All entries are charged at standard rates. Free minutes do not apply. A panel of judges will judge the entries based on creativity (50 percent) and photography quality (50 percent). The decision of the judges is final and no correspondence will be entered into. Photographs must have been taken before the closing date.

3. Digital entries must be in JPEG format and must be in JPEG format. A low res version can be sent as long as high resolution is available for printing. Originals must be in print-ready format.

4. All entries in this competition will be judged. Judges will judge the entries on criteria such as composition, cropping, the use of a fisheye lens, contrast, sizzle, and other elements other than the above that is unacceptable and will render the photograph ineligible for the competition. The first five winners will receive a print of a SanDisk 8GB Extreme Pro 30MB/s SDHC card. Twelve winners will each win a year's subscription to NG KIDS, a Nikon Coolpix S600 camera, a pair of Nikon 200s camera and a compactor containing a SanDisk 8GB Extreme Pro 30MB/s SDHC card, a SanDisk Clip+ and a MP3 player, a SanDisk microSD 4GB SDHC and adapter. The overall winner will receive a Nikon D3000 Twin Lens Kit (AF-S DX VR and AF-S 18-55mm), Free camera training, a family holiday for four in Sable Sabi and a hamper consisting of a SanDisk 16GB Extreme Pro 30MB/s SDHC card, a Sandisk USB Flash Drive All-in-one USB 3.0 card reader and a Sandisk Cruiser USB 2GB USB Flash Drive. The Sable Sabi prize includes return air travel from Kruger National Park and return air travel from the UK. The Sable Sabi prize includes return air travel from Kruger National Park and return air travel from the UK. Digital manipulation or software manipulation is not acceptable. Persons under the age of 16 are not allowed on walking safari. Airlink will sponsor return flights on Airlink from Cape Town, Johannesburg or Durban to Kruger National Park.

GENERAL TERMS AND CONDITIONS FOR MOVIE SCREENING
The competition opens on Monday 24 December and closes on 9 November 2012. Tickets will be awarded on a first-come first-served basis. Only one e-mail per household. No substitutions for cash or exchange for another movie. Please note: Only one ticket per family. There are 121 tickets available in Johannesburg, 16 in Cape Town and 16 in Durban. See full terms and conditions for all giveaways and competitions in NG KIDS.

Sammy's Adventures 2 in 3-D
In the sequel to A Turtle's Tale: Sammy's Adventures our favourite leatherback turtle is back. This time Sammy and Ray are caught by poachers who plan to ship them off to an aquarium in Dubai. Their grandchildren, hatchlings Ricky and Ella, have big plans to save them.

In the movie little Ricky and Ella are led out to sea by Sammy and Ray. In real life only one of every 1,000 eggs laid by female sea turtles will survive to become an adult sea turtle. Here's why:

1,000 eggs are laid and buried on sandy beaches.
800 sea turtles hatch. The rest never fully develop.
400 scurry off the beach into the open ocean. Others are eaten by crabs, birds and fish.
200 survive two to five years at sea. The rest are eaten by predators or get caught in fishing gear.
1 survives to be 30 to 70 years old. The remaining ones fall victim to sharks, capture and disease.

Sammy's Adventures 2 opens in cinemas on 23 November 2012.
STUMP YOUR PARENTS

If your parents can’t answer these questions, maybe they should go to school instead of you!

ANSWERS ON PAGE 50

1. Which of these animals is not poisonous?
   a. scorpion  b. pufferfish  c. blue-ringed octopus  d. vampire finch

2. What is the correct alignment during a solar eclipse?
   a. sun, moon, Earth  b. sun, Earth, moon  c. moon, sun, Earth  d. moon, Mars, Earth

3. Which pop singer had a hit with Firework?

4. Which actress has not starred in a Disney Channel TV show?

5. People report the most UFO sightings when ________ is closest to Earth.

6. Some people celebrate Guy Fawkes Night on 5 November by setting off fireworks. What was the man, Guy Fawkes, also known as?

7. Which wolf is the most common?
   a. howler wolf  b. grey wolf  c. black wolf  d. werewolf

8. A Goliath bird-eating tarantula can grow as large as a ________.
   a. saucer  b. dinner plate  c. bicycle wheel  d. trampoline

9. A hummingbird’s diet is 90 percent ________.
   a. insects  b. seeds  c. honey  d. nectar

10. How do migrating animals find their way?
    a. By using the sun as a compass.
    b. By following a mental map.
    c. By using Earth’s magnetic fields as a compass.
    d. All of the above.
KNOCK, KNOCK.
Who’s there?
Bean!
Bean who?
Bean fishing lately?
